

## **Statement of the UNI Global Union Management Committee on Israel and Palestine**

As bloodshed continues to escalate in Israel and Palestine, the UNI Management Committee calls upon the international community, especially the EU and US, to use their economic and political power to secure a ceasefire in the conflict and an end to all violence without delay.

These governments should also actively engage to secure a sustainable solution which addresses the underlying injustices and achieves long lasting peace.

Consistent with resolutions adopted at UNI World Congresses in 2014 and 2018, and more recently at the UNI Europa Conference last month, this means the full implementation of relevant UN Security Resolutions, an end to the occupation and negotiations towards the creation of two sovereign states.

We also call upon nations of the world to provide urgent humanitarian support to the people of Gaza, 56,000 of whom are now homeless, and many more without water, electricity or even sewage.
